PROFESSIONAL SUMMARY

Full Stack Developer and Mobile Lead with 4+ years building production web and mobile applications with React, React Native, NestJS and TypeScript. Specialized in real-time GPS tracking and geolocation platforms, and builder of SaaS products for SMBs under my personal brand, CodingIQ. Experienced shipping to the App Store and Google Play and delivering end-to-end solutions remotely for LATAM and U.S. clients. Bilingual in Spanish and English.

TECHNICAL SKILLS

Frontend: React.js, React Native, Ant Design, AngularJS
Backend: Node.js, NestJS, Prisma, Loopback, REST APIs
Languages: JavaScript, TypeScript
Styling: TailwindCSS, Styled Components, CSS3, HTML5
State & Data: Zustand, TanStack Query, Context API
Databases: PostgreSQL (Supabase), SQL Server
Tools: Git, Postman, Vite, Expo, React Native CLI, Xcode, Android Studio
Cloud & DevOps: Vercel, Railway, Supabase, DigitalOcean
Languages (Human): Spanish (Native), English (Professional — written & spoken)

PROFESSIONAL EXPERIENCE

Full Stack Developer (Mobile Lead)

Seguridad Móvil GPS | *Dec 2023 – Present*

- Lead developer responsible for the architecture, development and maintenance of two React Native applications: Optimus CA/MagnoTrack and Optimus Rutas
- Built and maintained a real-time GPS tracking platform used for vehicle monitoring, route tracking and client visit management
- Implemented route history, geolocation tracking, speed limit monitoring and automated reporting
- Developed a photo-based reporting system integrating dashcam data into the platform
- Designed and optimized map-based interfaces for real-time visualization of vehicles and field personnel
- Integrated background geolocation using TransistorSoft for continuous tracking on mobile devices
- Leading the Ant Design v4 → v6 upgrade of the OptimusRoutes and MagnoTrack web applications
- Manage application releases, versioning and deployments to the App Store and Google Play

Full Stack Developer

Seguridad Móvil GPS | *Jan 2022 – Jun 2022*

- Developed internal tools and web applications using JavaScript and Node.js
- Assisted in API development and database integration
- Participated in debugging and performance optimization tasks

Independent Full Stack Developer

CodingIQ (personal brand) | *2025 – Present*

Freelance client work and independent SaaS products for SMBs in Honduras and the U.S.

- **BrightCoat Ops — Operations Platform (Web & Mobile)**
  Client: BrightCoat Painting & Remodeling, LLC — Austin, TX
  Sole developer of a web and mobile platform that replaced the client's Excel-based tracking of jobs, properties, employees, invoicing, expenses and payroll. Includes field scheduling, a KPI dashboard (7 metrics, 5 charts, alerts) and role-based access (admin, finance, staff). In production and used daily by the business owner in the field.
  React, TypeScript, Vite, TailwindCSS, React Native CLI, Supabase (PostgreSQL, Auth, Storage)

- **AssistIQ — Attendance & Time-Tracking SaaS**
  Custom multi-tenant attendance system for Honduran companies.
  - Three-tier access model: super admin (companies, admin accounts, per-company employee limits), company admin and employees
  - Kiosk-style clock-in on shared devices (check-in, lunch, check-out) using employee code and PIN
  - Biweekly hours and pay calculation with configurable day and night hourly rates per company
  - Automated per-employee PDF reports of hours and days worked each pay period
  - Decoupled architecture with a separate REST API and web client

  NestJS, Prisma, React, TypeScript, PostgreSQL (Supabase), Vercel
- **ContaIQ — Accounting SaaS**
  Multi-tenant accounting platform for Honduran SMBs with general ledger, automatic journal entries, treasury, taxes (ISV 0/15/18%), reports and dashboard. Deployed and in beta testing.
  NestJS 11, Prisma, React 19, Zustand, TanStack Query, PostgreSQL (Supabase), Vercel, Railway
- **InventiQ — Billing & Inventory**
  Frontend for products, customers, invoicing (CAI and ISV support for Honduran tax requirements) and reports.
  React, TypeScript, TailwindCSS v4, Vite

Frontend Developer
Chekku | *Jul 2022 – Feb 2024*

- Led migration of a legacy AngularJS platform to React.js, improving scalability and maintainability
- Developed a dynamic check-in/check-out system with customizable forms based on client requirements
- Built dashboards displaying visit metrics, client data and operational insights
- Implemented map-based features with geolocation and marker visualization
- Improved UI/UX and performance across multiple modules

PROJECTS

Konta — Personal Finance Mobile App
React Native (Expo), Supabase, PostgreSQL, TypeScript

- Personal budgeting app tracking income, expenses, loans and savings in Honduran Lempiras, including bank balances and credit card debt
- Modular architecture with custom hooks, Context API and reusable components across six navigation tabs, with real-time charts backed by Supabase

EDUCATION

Computer Systems Engineering
Universidad Tecnológica Centroamericana (UNITEC) | San Pedro Sula, Honduras

AVAILABILITY

Open to full-time remote opportunities with teams in LATAM or North America. Available immediately.
